

## PRODUCT SAFETY & QUALITY POLICY (FOOD & FEED)

British Sugar is committed to producing legal, safe, authentic, quality products that meet the high standards required by our customers, through continuous improvement of our people, plant and processes.

This approach encompasses the way we design, develop, manufacture and distribute our extensive range of products into the food chain based on certification to ISO, BRC, FEMAS and Retailer standards.

British Sugar want our customers to choose us as a supplier for reasons other than price. We aim to do this by understanding what they need and value for their products to be successful and meet consumer expectations.

This policy statement is communicated to all British Sugar's employees and contractors.
